# iMedia Multimedia Broadcasting

iMedia is a multimedia tool which is able to broadcast information direct to a monitor, plasma screen or any other video display unit. The flexibility of the system allows you to display what you want and when you want. Video, text as well as live input are available.

Take control of scheduling information using the iMedia Manager. The manager will allow standard scheduling, timed scheduling and even cycled scheduling. This is a complete solution for scheduling and displaying information. Take advantage of the system and use it for an in-store radio station.

## WHERE CAN IT BE USED?

- Recreation complexes (Malls, Sports stadiums, Movie Houses)
- Education facilities (Schools, Libraries)
- Banks
- Hotels
